

Manne Sohini Amrutha Varshini

[LinkedIn](#) | [Github](#) | sohinimanne@gmail.com | +917569473603 | [Hacker Rank](#) | [Leetcode](#)

Software Engineering student with strong foundations in DSA and System Design, experienced in building scalable, low-latency distributed systems and full-stack applications using modern backend and cloud technologies. Passionate about developing secure, high-availability, and production-ready systems that deliver real-world impact.

EDUCATION

B.Tech, Computer Science , SRM Institute of Science and Technology	Graduating in July 2027
Relevant coursework: Data Structures and Algorithms , OOPs, OS, DBMS, AI , SERBOT.	CGPA: 9.07

SKILLS

Languages: C++, C, Java, Python, HTML, CSS, JavaScript, SQL **Web Development:** React.js, Tailwind CSS, Streamlit, JWT, WebSockets, Zod

Backend & Systems: Apache Kafka, Node.js, Express.js, Microservices, REST APIs, JDBC, System Design, DSA

Machine Learning: PyTorch, PyTorch Geometric, Scikit-learn, NeuralForecast, Transformers, SHAP, LIME

MLOps & Tools: Docker, AWS, Feast (Feature Store), BentoML, Git, Postman, MongoDB

Soft Skills: Time Management, Teamwork, Problem-solving, Quick-Learner & Performer, Analysis

PROJECTS

AnomalyGuard(Technologies Used: Python, Apache Kafka, Feast, BentoML, Isolation Forest, Streamlit) - [AnomalyGuard](#)

- An event-driven, end-to-end microservices architecture that can identify user anomalies in milliseconds by ingesting live Kafka streams.
- A reliable pipeline that solves training-serving skew for low-latency inference by utilizing a Feature Store (Feast) and Scalable Serving (BentoML)

DeepHierarch(Technologies Used: Python, NeuralForecast, HierarchicalForecast, Streamlit, Plotly, Pandas, NumPy) - [DeepHierarch](#)

- Created a global deep learning pipeline with N-HiTS to forecast more than 300 hierarchical time series at once, capturing seasonality and intricate cross-series correlations.
- Minimum Trace (MinT) reconciliation was used to address structural incoherency and reduce forecast variance while ensuring mathematical consistency between regional and product-level aggregates.

ProBrief AI(Technologies Used: React.js, Node.js, Express.js, MongoDB, TypeScript, Tailwind CSS, Google Gemini API, Zod) - [ProBrief AI](#)

- Developed circuit breaker model for API reliability featuring fallback simulation mode, guaranteeing 100% availability during service interruptions.
- Established security protocols such as rate limiting (100 requests per 15 minutes), Zod input validation, and Helmet middleware to guard against injection attacks

Personal-Search-Engine(Technologies Used: Java, SQLite, Java Swing, DSA) - [Personal-Search-Engine](#)

- Implemented the inverted index with the PageRank algorithm to provide ranked search results across crawled web pages stored in SQLite.Built autocomplete feature with query logging system to track user search patterns and improve suggestions.
- Implemented a Java Swing GUI with the web crawler module, which allows full-text search with result snippets and clickable URLs.

OTHER EXPERIENCE

Technical Member, ACM Student Chapter, SRMIST Chennai	Feb 2024 - present
Public Relations, Directorate of Student Affairs, SRMIST Chennai	Jan 2024 - March 2025
Challenges and Hackathons, AARUUSH, SRMIST Chennai	Aug 2023 - Sep 2024

CERTIFICATIONS

TCSION in collaboration with IITKGP - AI for real-world Applications	CISCO – Python, Intro to Cyber Security
Matlab – Machine Learning, Deep Learning	NPTEL – Introduction to Machine Learning
Google - AI-ML (AICTE), Android Developer (AICTE)	AWS - AI-ML (AICTE)

PARTICIPATIONS

- Secured a Top 25 position in the Hack Cosmos Hackathon, conducted by CSI at SRM University.
- Participated in CreaTech 2024, a national-level Technology Innovation Contest organised by Larsen & Toubro.
- Participated in Flipkart Runway Season 5, a career acceleration program for women in engineering.
